For your Safety

At Westbrook Dental, the health and safety of our patients and team is the top priority. Amid the growing concerns around Coronavirus, we are taking additional steps to be extra vigilant. This is an evolving situation and we are monitoring it closely to ensure all proper precautions are being taken so everyone feels safe coming to their appointments.

Our daily cleaning procedures are already very thorough, however given the current situation, we are elevating our cleaning practices to keep our office a safe and welcoming space for everyone. These additional measures include increasing the frequency of cleaning all shared areas along with our already sterilization of all operatories. Antibacterial and antimicrobial cleaning solutions are being used and daily deep cleaning of our rooms is taking place.

We encourage our patients and team to follow these best practices to help keep yourself and others healthy:

- Wash your hands often with soap and water for at least 20 seconds, especially after visiting the restroom; before eating; after blowing your nose, coughing, sneezing or touching your face
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Consider staying home if you are feeling unwell
- Cover your cough or sneeze with a tissue, then discard the tissue in the trash and wash your hands
- Utilize the hand sanitizer around the office as needed.
- Keep disinfectant with you as a precaution
